Please provide your e-mail address. Conservation is our middle name and we will no longer send out bulk mailings. *It is unlawful for trees to be resold with roots attached: P.A. Of 1981 as amended.*

Our liability for plant material ceases when plants are picked up.

CONIFERS

Blue Spruce *Picea pungens*: Slow growing reaching 30-60 feet in height. It grows on moist soils known for its hardiness and blue color. Makes a good Christmas tree and good for landscaping. Sun to partial shade.

Norway Spruce *Pinus abies*: Moderately fast growing tree that reaches 60-90 feet in height. It prefers moist clay to loam soils and is shade tolerant. Needles are dark and short. Valued for landscaping, windbreaks and wildlife cover.

Red Pine *Pinus resinosa*: Moderate to fast growing tree that is 50-80 feet tall at maturity. It grows best in well drained sandy soils and full sun. Dark green needles are 4-6" long in bundles in of two. It is used for windbreaks, landscaping and timber.

White Pine *Pinus strobus*: Michigan's State tree! Moderate to fast growing tree that can reach 80-100 feet tall. It prefers rich, moist to well-drained soils and is shade tolerant. Needles are soft and grow in bundles of 5. Used for timer, wildlife, cover and windbreaks.

White Spruce *Picea glauca*; Michigan's native spruce. Slow growing, shade tolerant and can be 60-90 feet tall. Prefers well drained clay loam soils but tolerates heat, drought and high water. Used for landscaping, windbreaks and wildlife cover.

Red Cedar *Juniperus virginiana*: Moderately fast growing tee reaching 40-50 feet in height. It is a native and bears bluish cones (berries). Excellent wildlife tree and excellent for windbreaks.

HARDWOODS / DECIDUOUS TREES

Quaking Aspen *Populus tremuloides*: Fast growing tree reaching 40-60 feet in height. It will tolerate most soils, but prefers moist soils and likes full sun. The broad flat leaves tremble or quake in the light breeze

Black Walnut *Juglans nigra*: Reaches 60-80 feet in height and a trunk diameter of 2-3 feet. This hardwood is shade tolerant. It grows best on moist sandy loams. The nuts produced are a good food source for wildlife. The timber is valued for furniture, veneer and gun stocks. This tree does put allelopathic chemicals into the soil which may prohibit some plants from growing.

Red Maple *Acer rubrum*: Fast growing and can reach 45-60 feet in height. It will grow in poorly drained and well drained soils and is shade tolerant. It is valued for its red buds, twigs and fall color. This is a good tree for landscaping and for wildlife.

Sugar Maple *Acer saccharum*: Slow to medium growing tree that reaches 80-100 feet tall. Grows well on moist soils and is moderately shade tolerant. This tree is used for timber, landscaping, and maple syrup production.

White Oak *Quercus alba*: Slow growing tree that reaches 45-80 feet tall. Prefers full sun and well drained sandy loam to clay loam soils. Great ornamental or forest tree that is valued for timber and wildlife.

Pin Oak *Quercus palustris*: Fast growing reaching 60-70 feet in height. It has bright red leaves in the fall. It prefers moist soils. It is often known as a street tree.

Red Oak *Quercus rubra*: This is a fast growing tree reaching 70-90 feet in height. It is known as the "Champion Tree" because of its growth and shape. It prefers moist soils and grows in the sun or partial shade.

Canoe Birch *Betula papyrifera*: Fast growing tree reaching 50-70 feet in height. Young trees have a bronze to brownish bark and mature trees have chalk white bark which can peel away. Grows on moist soils and needs full sun to partial shade.

Whitespire Birch *Betula populifolia*: Fast growing tree reaching 30-40 feet in height. Prefers full sunlight and moist, well-drained soils but will adapt to a variety of soil conditions. Is more heat tolerant than other Birches and its bark does not exfoliate. Has a narrow pyramidal form with dark, glossy leaves which turn yellow in the fall.

Chinese Chestnut *Castanea mollissima*: This is a fast growing tree reaching 40-60 feet in height. It produces nuts in just a few years after planting. It needs 2 trees for pollination. It prefers drier soils but will do ok on most soils.

American Mountain Ash-*Sorbus americana*: Is not in the Green Ash Family. Smooth bark tree growing up to 30 feet tall. Clusters of white flowers that bloom into brightly colored clusters of red berries in the summer time. Berries are eatable and a favorite of many birds and mammals. Prefers acidic soil with good drainage, full sun to light shade.

SMALL TREES / SHRUBS

Highbush Cranberry *Viburnum trilobum*: Grows 4-10 feet tall, prefers moist sites. Flowering shrub that produces small white clusters of flowers followed by red fruit. Excellent wildlife plant, fruit provides great winter food source for birds. Can tolerate some shade.

Red Osier Dogwood *Cornus stolonifera*: Grows 3-9 feet tall. Older twigs have a red or purplish red color that lasts all year creating an attractive winter focal point. This is a great plant for stream bank restoration and landscaping.

Ninebark *Physocarpus opulifolius*: Grows to 20 feet, prefers wet sites, but will grow on drier sites. Fast growing plant is shade tolerant. Has white flowers in May-June followed by blue fruit in September.

Eastern Redbud *Cercis canadensis*: Small tree 12-25 feet high. Flowers April-May before or with the leaves. Fruit-legume, June-July persistent in winter. Moderately shade tolerant, slow growing, grows well on many soils. Highly prized as an ornamental due to showy pink flowers in early spring.

Downy Serviceberry *Amelanchier arborea*: Shrub or small tree up to 40 feet with a narrow crown, 4-12" in diameter. Showy white flower in April-May with red to purple round berry in June-August. Shade tolerant, slow growing, intolerant of moist soils.

Common Lilac *Syringa vulgaris*: Generally between 8-12 feet tall but can reach up to 20 feet at maturity. Flower are purple and bloom from late spring to early summer. Does well in a wide range of soils but requires full sun.

Forsythia - Lynwood Gold *Forsythia x intermedia*: This shrub is fast growing and reaches 8-10 feet in height. Excellent border shrub with brilliant yellow flowers in early spring. Likes full sun and will tolerate most soils.

Butterfly Bush *Buddleja: davidii*: This is a fast growing shrub reaching 10-15 feet in height. It is called the summer lilac due to its similar fragrant flowers that bloom all summer long. It likes all soils and full sun.

Nannyberry *Viburnum lentago*: This bush medium in growth rate and will reach 10 - 20 feet in height. It has showy white flowers and fruit is edible and makes good jam. Its fruit is great for wildlife. It prefers mesic soils and can be in the sun or partial shade.

Fragrant Sumac *Rhus aromatic*: This bush tends to umbel shaped and grows at a medium rate. It reaches 8 -18 feet in height and width. Great wildlife escape cover with aromatic leaves. The red drupes (fruit) is good wildlife food and makes good tea. It prefers dry soils and full sun to partial shade. It will make a good border planting.

Magenta Crab Apple *Malus pumila*: This small tree will get 25 feet in height. It is medium in growth rate and prefers mesic soils. It will grow in full sun. It has magenta flowers in the spring with red fruit and preferred by wildlife. The leaves stay reddish for most of the summer.

Nanking Cherry *Prunus tomentosa*: This shrub/small tree will get 10 feet in height. It has shiny reddish bark with beautiful white blossoms in early spring. Fruit are scarlet red, but should have 2 trees for good pollination. It grows at a medium rate in various soils and full sun. Great for borders or in a windbreak and excellent wildlife food source.

GARDEN

Mary Washington Asparagus Root- Perennial vegetable that grows 3-7 feet high. Prefers full to partial sun and deep well-drained soils. Ready for harvest after two years and the graceful, feathery green foliage is still attractive after harvest.

Bluecrop Blueberry- Delicious to eat and relative easy to grow. It needs a soil with a ph between 4 and 5. The soil needs to drain easily. Need 2 plants for good pollination.
