Sizes (height) listed are provided by the nurseries. Actual size may vary based on nursery grading and growth.

OAKLAND CONSERVATION DISTRICT SPRING 2020 TREE SALE

SAVE TREES: PLEASE PROVIDE YOUR EMAIL ADDRESS

CONIFERS

Douglas Fir *Pseudotsuga menziesii*: Medium growing tree reaching at least 50 in height. It grows best on well drained soils and likes full sun. Makes a good Christmas tree and good for landscaping.

Norway Spruce *Pinus abies*: Moderately fast-growing tree that reaches 60-90 feet in height. It prefers moist clay to loam soils and is shade tolerant. Needles are dark and short. Valued for landscaping, windbreaks and wildlife cover.

Red Pine *Pinus resinosa*: Moderate to fast growing tree that is 50-80 feet tall at maturity. It grows best in well drained sandy soils and full sun. Dark green needles are 4-6" long in bundles of two. It is used for windbreaks, landscaping and timber.

White Pine *Pinus strobus*: Michigan's State tree! Moderate to fast growing tree that can reach 80-100 feet tall. Prefers rich, moist to well-drained soils and is shade tolerant. Needles are soft, grow in bundles of 5. Used for timber, wildlife, cover & windbreaks.

White Spruce *Picea glauca*; Michigan's native spruce. Slow growing, shade tolerant and can reach 60-90 feet tall. Prefers well drained clay loam soils but tolerates heat, drought and high water. Used for landscaping, windbreaks and wildlife cover.

Red Cedar *Juniperus virginiana*: Moderately to fast growing tree reaching 40-50 feet in height. It is a native and bears bluish cones (berries). Excellent wildlife tree and excellent for windbreaks.

HARDWOODS / DECIDUOUS TREES

Quaking Aspen *Populus tremuloides*: Fast growing tree reaching 40-60 feet in height. It will tolerate most soils, but prefers moist soils and likes full sun. The broad flat leaves tremble or quake in the light breeze.

Black Walnut *Juglans nigra*: Reaches 60-80 feet in height and a trunk diameter of 2-3 feet. This hardwood is shade tolerant & grows best on moist sandy loams. The nuts produced are a good food source for wildlife. The timber is valued for furniture, veneer and gun stocks. This tree does put out chemicals into the soil which may prohibit some plants from growing.

Red Maple *Acer rubrum*: Fast growing and can reach 45-60 feet in height. It will grow in poorly drained and well drained soils and is shade tolerant. It is valued for its red buds, twigs and fall color. This is a good tree for landscaping and for wildlife.

Sugar Maple *Acer saccharum*: Slow to medium growing tree that reaches 80-100 feet tall. Grows well on moist soils and is moderately shade tolerant. This tree is used for timber, landscaping, and maple syrup production.

White Oak *Quercus alba*: Slow growing tree that reaches 45-80 feet tall. Prefers full sun and well drained sandy loam to clay loam soils. Great ornamental or forest tree that is valued for timber and wildlife.

Pin Oak *Quercus palustris*: Fast growing reaching 60-70 feet in height. It has bright red leaves in the fall. It prefers moist soils. It is often known as a street tree. Leaves tend to be narrower than red oak.

Red Oak *Quercus rubra*: This is a fast-growing tree reaching 70-90 feet in height. It is known as the "Champion Tree" because of its growth and shape. It prefers moist soils and grows in the sun or partial shade.

Canoe Birch *Betula papyrifera*: Fast growing tree reaching 50-70 feet in height. Young trees have a bronze to brownish bark and mature trees have chalk white bark which can peel away. Grows on moist soils and needs full sun to partial shade.

American Beech *Fagus grandifolia*; has smooth steel gray bark and can reach 80 feet at maturity. It's a slow growing tree in mature oak/maple forest. Likes rich well drained soils and needs full sun to partial shade. Excellent tree for wildlife.

Chinese Chestnut *Castanea mollissima*: This is a fast-growing tree reaching 40-60 feet in height. It produces nuts in just a few years after planting. It needs 2 trees for pollination. It prefers drier soils but will do ok on most soils.

American Chestnut- *Castanea dentata*- Due to disease issue the chestnut will grow to about 30 ft. tall. Needs full to partial sun and mesic to dry soils that are loam, clay or rocky material. Producer of edible nuts.

SMALL TREES / SHRUBS

Highbush Cranberry *Viburnum trilobum*: Grows 4-10 feet tall, prefers moist sites. Flowering shrub that produces small white clusters of flowers followed by red fruit. Excellent wildlife plant, fruit provides great winter food source for birds. Can tolerate some shade.

Red Osier Dogwood *Cornus stolonifera*: Grows 3-9 feet tall. Older twigs have a red or purplish red color that lasts all year creating an attractive winter focal point. This is a great plant for stream bank restoration and landscaping.

Ninebark *Physocarpus opulifolius*: Grows to 20 feet, prefers wet sites, but will grow on drier sites. Fast growing plant is shade tolerant. Has white flowers in May-June followed by blue fruit in September.

Eastern Redbud *Cercis canadensis*: Small tree 12-25 feet high. Flowers from April-May just about the time the leaves emerge. Fruit-legume, June-July persistent into winter. Moderately shade tolerant, slow growing, grows well on many soils. Highly prized as an ornamental due to showy pink flowers in early spring.

Shadblow Serviceberry *Amelanchier arborea*: Shrub or small tree up to 40 feet with a narrow crown, 4-12" in diameter. Showy white flower in April-May with red to purple round berry in June-August. Shade tolerant, slow growing, intolerant of moist soils.

Fragrant Sumac *Rhus aromatic*: This bush tends to be umbel shaped and grows at a medium rate. It reaches 8 -18 feet in height and width. Great wildlife escape cover with aromatic leaves. The red drupes (fruit) is good wildlife food and makes good tea. It prefers dry soils and full sun to partial shade. It will make a good border planting.

Common Lilac *Syringa vulgaris*: Generally between 8-12 feet tall but can reach up to 20 feet at maturity. Flower are purple and bloom from late spring to early summer. Does well in a wide range of soils but requires full sun.

American Hazelnut *Corylus Americana*; Generally, between 4-15 feet tall. Sun to partial shade; moist-dry mesic soils and any soil type (rocky-sandy-loam). Great for wildlife; Used by insects, birds, mammals as a food source and as escape cover. Nuts are preferred food source and are a sweet edible nut for human use.

American Plum- *Prunus American-* Wild plum, also called American plum is a small, fast-growing, colony-forming native shrub/tree. Abundant tiny white flowers open before the leaves emerge in spring. Plums appear in late summer. Plums are great to eat off the plant or make jellies or preserves. Great shrub for birds and other wildlife.

Rose of Sharon *Hibiscus syriacus*: 8-12' shrub or small tree with numerous upright branches. Blooms from July through September. Tolerates moist soil and full sun. Excellent border shrub with flowers that are white, pink, lavender or purple. It fits well with landscaping and is a good flower for pollinators.

Silky Dogwood- *Cornus amomum-* will grow to be 6-10 ft. tall. You can manage the height by cutting/trimming. Young plants have bright red stems which turn gray as the bush ages. It white blossoms show up in mid-June and bear bluish fruit in September. It grows best in moist soil somewhat poorly drained and is shade tolerant. This plant is good for shelterbelts, hedges, stream restoration and wildlife borders.

GARDEN

Jersey Knight Asparagus Root- Perennial vegetable that grows 3-7 feet high. Prefers full to partial sun and deep well-drained soils. Ready for harvest after two years and the graceful, feathery green foliage is still attractive after harvest.

Northland Blueberry- Delicious to eat and relatively easy to grow. It needs a soil with a ph between 4 and 5. The soil needs to drain easily. Need 2 plants for good pollination.
